

## **20 years later...and still growing**

On each of the cedar seedlings order forms for the past twenty years has been a picture showing a woman receiving cedar seedlings on Cedar Pick-up Day from two of your volunteers; Bernie Fowler and Don Zelenka.

The woman in the picture is Helen Woodbury who has a cabin on the south branch of the Au Sable near Chase Bridge. Starting in 1997 and continuing for several years, Mrs. Woodbury has planted and protected cedars at her cabin. Today...20 years later, she has grown to maturity twelve tall, healthy and impressive northern white cedars that will continue to shade and protect her river for years to come.

Great job, Mrs. Woodbury. Thanks for your dedication.

And thanks to all that have done the same for their section of the river.
